

EZRA MAYURGA

Computer Science Student — Data Science & AI

South Tangerang, Indonesia | +6281317676980 | ezra.mayurga03@gmail.com | [LinkedIn](#) | [Portfolio](#) | [GitHub](#)

PROFILE

Computer Science student at BINUS University specializing in Intelligence Systems, currently gaining hands-on data science experience as a Data Science and Analytics Intern. Skilled in building end-to-end data pipelines, forecasting models, and interactive dashboards that translate raw data into actionable business decisions.

Key achievement: Authored and presented an IEEE-format research paper comparing Classical ML vs. Deep Learning for stock price prediction, for publication at ICORIS 2026.

WORK EXPERIENCE

Data Science and Analytics Intern, July 2026

Zidio Development — Bengaluru, India (Remote)

- Analyzed 10M+ transaction & inventory records using Python (Pandas) to build demand intelligence models, improving overall inventory health.
- Built automated Python ETL pipelines using Pandas for data cleaning and EDA, reducing dataset processing time by 60% while maintaining 100% data integrity.
- Engineered an inventory risk framework in Python, identifying 30% overstock (dead stock >90 days) and preventing potential stockouts across core SKU categories.
- Translated complex transaction metrics into executive slide decks and strategic reports across 12 analytics domains to automate reorder points and improve sales forecasting.

CrewAug 2025

BRI Consumer Expo — PT Dyandra Promosindo

- Provided on-ground assistance for thousands of visitors and helped handle 11 automotive tenants, including Toyota, BMW, and BYD, during the 3-day BRI Consumer Expo 2025 Jakarta.
- Coordinated with a team of 10+ crew members to facilitate smooth event operations.

EDUCATION

Universitas Bina Nusantara (BINUS) — Jakarta, IndonesiaAug 2024 – Aug 2028 (Expected)

Undergraduate in Computer Science, focusing on Intelligence Systems

- Author & Presenter, IEEE-format research paper: "Classical ML vs. Deep Learning for Stock Price Prediction", ICORIS 2026.
- Team Lead, PKM-KC — Golf Helper Identifier, an AI-powered golf swing analysis platform (YOLOv8-Pose + Gemini 2.5 Flash).
- President, BVoice Radio BINUS University (2025–2026) — led a 100+ member student organization.
- Microsoft Azure AI Fundamentals Completion Certificate — BINUS x Microsoft (2026)

ORGANIZATIONS

President, Mar 2025 – Mar 2026

BVoice Radio — Jakarta, Indonesia

- Directed strategic vision and off-air programming for BVoice Radio, overseeing flagship events that reached 700+ participants (Expo) and 356 participants out of 500 capacity (Seminar).
- Built and managed relationships with sponsors, media partners, and educational institutions to open new event revenue streams.
- Mentored and advised the incoming DPI post-tenure, providing hands-on guidance during major events, brainstorming solutions for on-ground issues, and tracking progress across all divisions.
- Personally selected and onboarded the successor DPI alongside the outgoing DPI, ensuring continuity of leadership and smooth organizational transition.

Backend DeveloperMar 2026 – Present

BVoice Radio — Jakarta, Indonesia

- Maintained and supported backend APIs powering BVoice Radio's web platform and internal station tools.
- Built an automated email reminder system for BVoice's seminar program, reaching 356 registered participants ahead of the event date.
- Extended the automated email reminder system to BVoice's Runora charity run event, supporting 70+ participants.
- Collaborated with the frontend team on feature deployment and managed database structure for efficient user data handling.

ProducerMar 2026 – Present

BVoice Radio — Jakarta, Indonesia

- Produced weekly on-air broadcasts, overseeing cross-functional teams to ensure smooth execution and compliance with broadcast standards.
- Curated content strategy aligned with Gen-Z listener interests, contributing to an average of +8 listeners per session.

AnnouncerMar 2025 – Present

BVoice Radio — Jakarta, Indonesia

- Hosted live radio broadcasts and managed real-time audience interaction across youth-focused content segments.
- Produced and curated creative content segments to maintain consistent listener engagement.

PROJECTS

Gambling Content Detection on YouTube Comments — NLP, Python, Naive Bayes, Regex (2026)

- Built a Naive Bayes + regex-based text classification pipeline to detect gambling-related spam ("judol") across 268 YouTube comments, achieving a 72% detection rate.
- Combined statistical classification with pattern-matching rules to handle Unicode obfuscation, supporting safer content moderation.

Edge Detection & Image Processing Pipeline — Computer Vision, Python, OpenCV (2026)

- Implemented a computer vision pipeline using Gaussian filtering and Canny Edge Detection to extract structural image features.
- Explored convolution operations and spatial filtering techniques as part of applied computer vision coursework.

SKILLS

Technical: Demand Forecasting, Exploratory Data Analysis, Risk Scoring, Data Cleaning & Pipelines, Dashboarding, Text Classification

Softwares: Python, Pandas, NumPy, Scikit-Learn, Statsmodels, Prophet, LightGBM, OpenCV, Streamlit, FastAPI, Matplotlib, Plotly, Git & GitHub

OTHERS

Languages: Indonesian (Native), English (Proficient)

Certifications & Training: Completion of Microsoft Azure AI Fundamentals — BINUS x Microsoft, Completion of GreatNusa (2026); What Is Generative AI? — LinkedIn Learning (2026)

Selected Achievements: Gold Medal, National Mathematics Olympiad — National Science Olympiad 2.0 (2022); Pre-University Program (Physics), Universitas Indonesia (2024)
